Hinged Round-Top Lunch Box

Makes one 5" x 3.5" Lunch Box

Supplies :

- Box Base and Lid: Star Paper, Classic Calico by Studio Calico
- Accents: Pink, Cream, Tan, White, Black Cardstock
- Pink Ribbon
- 3-Dimensional adhesive
- 12 Brads
- 2 Eyelets
- Liquid Glue
- Chalk or Ink

Instructions:

1. Cut out all the pieces to the lunch box. Ink and or chalk all the pieces to your project. Assemble the base of the box as pictured.
2. Cut out the lid. Be generous with the glue when assembling projects that require tabs to give it the curved look.
3. Cut out all the panel pieces that will go on all four sides of the box base. Glue in place.
4. Decide where you would like the buckle to be positioned. I used brads to hold the buckle in place on the lid. I liked using the brads because it gave the buckle a more 'hardware' look. It was the perfect touch!

Assemble the base.

Glue the lid tabs.

5. Take the rectangle strip and fold in half. This will act as the hinge to your project. Next, add the paper hinges to the back of the lunchbox using brads.
6. Now that the lid and base are assembled you can decide where you would like the buckle to be positioned. I used brads to hold the buckle in place on the lid. Close the lid and determine where you would like the eyelets to be positioned so that you can feed the ribbon through the eyelets to tie the lid down in place. Eyelets are perfect when using ribbon in your projects.
7. I also used brads to hold the handle in place. The reason that this worked out so nicely is because in order to open the box top you will need to be able to freely move the handle in order to open the lid.
8. Glue down the curved square to the front of the box and then assemble the medallion and glue in place.

Attach base to lid with long rectangle hinge.
